System Security Plan (SSP)

System Name: OSG Systems
Organization: SkyLine C5i, San Diego, CA
System Owner: H. Simpson, ISSM

1. System Scope

OSG Systems supports Navy cyber operations by providing secure, contractor-managed network enclaves for classified and unclassified mission systems. The system is designed to meet RMF requirements and leverages DISA STIGs, ACAS scanning, HBSS monitoring, and eMASS documentation. Primary functions include cross-domain data transfer for fleet intelligence, vulnerability management, and cyber incident response.

2. Security Controls Implementation

SkyLine C5i has implemented NIST SP 800-53 Rev 5 controls as tailored for Navy systems, including: • AC-2: Account Management • SC-7: Boundary Protection • SI-2: Flaw Remediation • IR-4: Incident Handling Cross-Domain Solutions are configured per NSA guidelines. Annual control assessments are documented in eMASS, and POA&M items are actively tracked.

3. Points of Contact

ISSM: H. Simpson (harold.simpson@skylinec5i.mil) ISSO: M. Simpson (marge.simpson@skylinec5i.mil) System Engineer: L. Simpson (lisa.simpson@skylinec5i.mil) Training Manager: B. Simpson (bart.simpson@skylinec5i.mil)
